OPTURION
Intelligent Decision Support

ALERTSAFE™

AlertSafe™ is used by leading organisations to deliver a more targeted and comprehensive approach to rostering and fatigue management.

Opturion provides a fast, reliable and cost effective suite of targeted cutting-edge technologies, and expert consulting services that assist organisations in mitigating and managing fatigue risks. You can gain powerful insights and prove the competency level of each employee, during shift work.

AlertSafe™ helps solve these common rostering problems, while supporting manual and automatic roster building:

- Roles and responsibilities
- Rostering and hours of work guidelines
- Identification and assessment of fatigue-related risks
- Practical fatigue control measures
- Reporting of fatigue and support services.

Cloud based:
Notification and staff management are accessible anywhere in real time.

Multi-platform:
The software can be accessed through a web browser as well as an app. Rosters can be viewed on laptops, smartphones and tablets.

User friendly interface:
An interface that is easy to navigate, learn and understand.
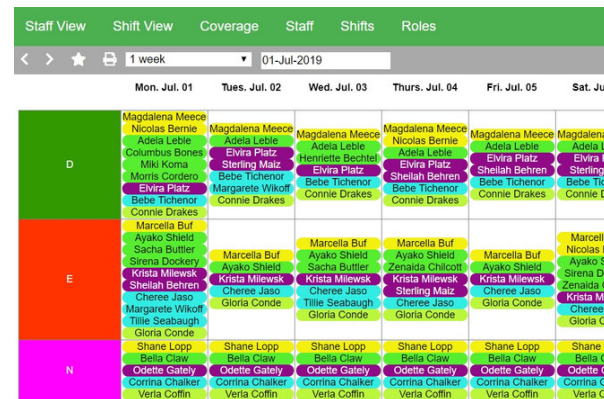

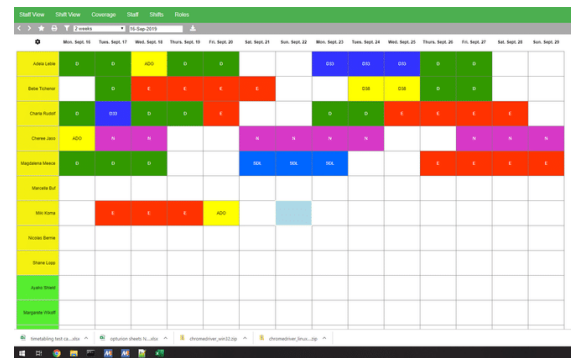

Powerful Rostering:
An Microsoft Excel based roster builder that uses Artificial Intelligence to automatically build rosters, while incorporating the latest research on alertness and fatigue.

Communication:
Multiple ways - notifications, communication board and portal.
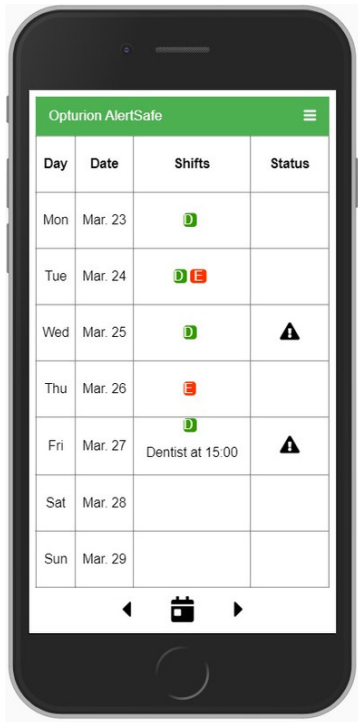

Efficiency:
Increased efficiency. A decrease in errors, bad customer outcomes, and accidents.

OPTURION
Intelligent Decision Support

Adaptive Rostering:

A critical element in fatigue risk mitigation is optimising planned rosters to reduce the likelihood of fatigue (based on required coverage and available resources).

Benefits of AlertSafe™:

- Identifies potential fatigue hot spots in the roster and/or high-risk individuals, so that appropriate control measures can be implemented.
- Provides active monitoring of actual hours worked and dynamic redesigning of rosters, as demands and resources change.
- Includes real-time quick assessment tools to measure and monitor fatigue risk in workers. Included are Alertness Self-Assessment Tool and Supervisor Fatigue Assessment Tool.

Admin & Staff Portals:

- Administrators can create roles, assign shifts to staff, manage swap requests and change shifts.
- Administrators can define and edit business rules, skill requirements, fatigue rules and risk mitigation requirements.
- Administrators can track fatigue, availability and attendance.
- Staff can manage swaps, work days and request leave.
- Staff can get advice on the best sleep patterns to promote good quality rest and reduce fatigue.

AlertSafe™ rosters have been built and implemented for medical staff at two of Australia's leading hospitals (Austin Health and the Monash Medical Centre); and for construction staff at the John Holland Group.
